

# Bug-N-Sluggo®

INSECT, SLUG AND SNAIL BAIT

**A BROAD-SPECTRUM BAIT THAT CONTROLS INSECTS, SLUGS AND SNAILS.**

A highly compressed, convenient bait formulation that combines spinosad for insect control and iron phosphate for slug and snail control.

## PRODUCT HIGHLIGHTS

Unlike most other baits that only target ants, Bug-N-Sluggo also targets earwigs, cutworms, slugs, and snails

Manage multiple pests with one bait application, saving growers time and money.

Bug-N-Sluggo bait pellets are highly compressed "shorts" with patented UV and rain resistant technology, posing little risk to the environment and beneficial invertebrates.

Ideal for Integrated Pest Management (IPM) programs in organic and conventional production.

Always carefully read and follow label instructions.

## THE ALL-IN-ONE BAIT FOR INSECTS, SLUGS, AND SNAILS

Bug-N-Sluggo® is a soil-applied, granular insect bait containing the active ingredients iron phosphate and spinosad. It attracts and kills common pests including ants, earwigs, cutworms, sowbugs, pillbugs, crickets, slugs, and snails. Bug-N-Sluggo can be used in commercial agricultural crops, ornamentals, herbs, seed crops, lawns, and gardens and is listed by OMRI for use in organic production.

Slug Damage to Seedlings

Iron Phosphate

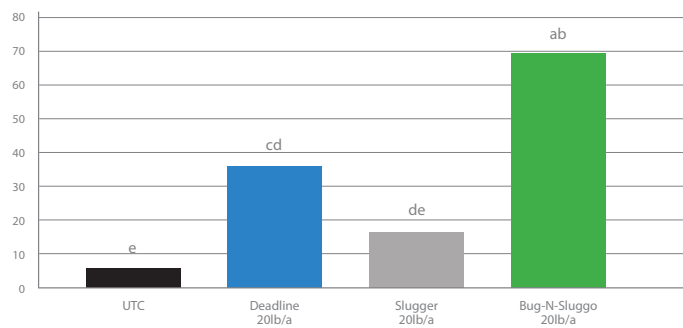

- Hybrid: Pioneer P1197AM, planted Apr. 15
- Application timing: May 11 (26 DAP)
- Treatments broadcast with handheld fertilizer spreader
- Plots were 4 rows wide (30 inch centers) x 20 ft. long
- Means sharing the same letter are NSD @ P = 0.05

% Control DAT 14

Control of Snails in Citrus

Iron Phosphate

- Dave Holden, Oxnard, Ca. Citrus grove
- 100 snails per cage, one appl. RCB design
- Bars with same letter NSD P=0.05
- Active Ingredient: Iron Phosphate

## HOW IT WORKS

Once ingested, iron phosphate causes slugs and snails to cease feeding. Dead slugs and snails may not be visible as they often crawl away to secluded places. Spinosad affects the insect nervous system, causing muscle contractions and paralysis, eventually leading to insect death. Spinosad has both contact and ingestion insecticidal toxicity. Bug-N-Sluggo® remains effective for up to four weeks.

## USAGE

Bug-N-Sluggo® can be used on: Vegetable crops including artichokes (globe), asparagus, beans, beets, broccoli, Brussels sprouts, cabbage, cantaloupe, carrots, cauliflower, corn, cucumbers, eggplants, garlic, lettuce, onions, peas, peppers, potatoes, radishes, rutabagas, spinach, soybeans, squash, Swiss chard, tomatoes and turnips. Fruits including apples, avocados, apricots, cherries, grapes, melons, peaches, plums, citrus, pears. Berries such as strawberries, blueberries, and loganberries. Also can be used on nuts, herbs, field crops, grass for seed production, and cereal crops. Bug-N-Sluggo®

## REDUCED RISK

Bug-N-Sluggo® contains spinosad, which is biologically derived from *Saccharopolyspora spinosa*, a naturally occurring soil organism, as well as iron phosphate, which are both active ingredients listed by the Organic Materials Review Institute for use in organic production and organic gardening

## KEY PESTS

Ants  
 Earwigs  
 Cutworms  
 Sowbugs  
 Pillbugs  
 Crickets  
 Slugs  
 Snails

## MAIN CROPS

Leafy vegetables  
 and brassicas  
 Strawberries and  
 cane berries  
 Fruiting  
 vegetables  
 Grapes  
 Cucurbits  
 Citrus  
 Stone fruit and  
 tree nuts  
 Pome Fruit  
 Wheat  
 Greenhouse

## ACTIVE INGREDIENT(S)

Iron phosphate . . . . . 0.97%  
 Spinosad (a mixture of spinosyn A and  
 spinosyn D). . . . . 0.07%
